

Stormwater Drain Fee

Effective August 1, 2006

Residential = \$ 6.25 per quarter

All others = \$ 37.50 per quarter

Much like our existing sewer and water utilities, a new program is underway to address the City's *STORMWATER* needs and reduce the level of pollution in our City. This Stormwater utility enables the City to manage and upgrade stormwater infrastructure; street catch basins, drain pipes, and brook channels; and protect our City's natural water bodies (e.g., Charles River and Crystal Lake) from potentially harmful elements in stormwater discharges. Other benefits include technical assistance with stormwater management questions, and educational programs for residents and schools.

For further information visit the City Website at www.ci.newton.ma.us and look under Department of Public Works; or contact Customer Service at (617) 796-1000.
